Subject: Re: Integration of DRMS
Dear DRMS team,

I had a brief discussion with Ralph Svetich at the 9/28 Delta Levee conference who recommended that I contact the DRMS email regarding the integration of DRMS findings into the HCP/NCCP Bay Delta Conservation Plan (BDCP). As I'm sure you agree, the DRMS research should be a critical component of all planning efforts for the Delta. I would encourage DRMS staff to speak with BDCP facilitator Undersecretary of Resources Karen Scarborough about the timelines for your efforts so that the timeline for preparation of the BDCP can be adjusted accordingly. In addition, we are concerned that potential climate change impacts will not be sufficiently incorporated into the BDCP process. There may be an opportunity for DRMS staff to provide some of the climate change information gathered through your risk assessment to the BDCP steering committee.

Thank you for your consideration of this issue. Your response would be greatly appreciated.
